Abstract of definition

The **KindAid: Donation & Service Contribution System** is a platform that connects NGOs, donors, and volunteers while also enabling users to help each other.

Along with donating goods and offering services, users can create fundraisers and use a community forum to ask questions, share advice, and provide support—similar to Quora.

This ensures efficient resource sharing, transparency, and stronger community collaboration for social good.

Problems solved by your idea

- **Resource Wastage** → Usable items often go unused or thrown away.
- **Lack of Skilled Volunteers** → NGOs struggle to find professionals for help.
- **Unclear Needs** → Donors don't know where support is required.
- **High Logistics Costs** → Long-distance donations are costly and slow.
- **Poor Communication** → NGOs and donors lack real-time coordination.
- **No Community Platform** → People lack a space to ask, share, and support.
- **Fundraising Challenges** → NGOs and individuals struggle to collect funds.
- **Unorganized Peer Help** → No structured way for users to help each other.

Study of similar ideas in the market

Case Study 1: VolunteerMatch

- **Overview:** VolunteerMatch is a global platform that connects NGOs with volunteers offering their time and skills.
- **Key Features:**
 - NGOs post opportunities for tutoring, legal help, event management, etc.
 - Volunteers can search by skill, cause, or location.
- **Impact:**
 - Over **16 million volunteers** connected to causes worldwide.
 - Strong in **skill-based volunteering**.
- **Limitations:**
 - No option for goods/material donations.
 - No crowdfunding/fundraising feature.

Case Study 2: Goonj

- **Overview:** Goonj is a grassroots NGO that turns urban surplus (clothes, books, furniture) into resources for rural development.
- **Key Features:**
 - Collects material donations from individuals.
 - Distributes resources for community development and disaster relief.
 - Promotes **recycling and reusing** urban surplus.
- **Impact:**
 - Supports rural communities across India.
 - Plays a major role in **disaster response and sustainable development**.
- **Limitations:**
 - Lacks a digital platform for real-time donor-NGO interaction.
 - No volunteering or skill-sharing system.
 - No community forum or peer-to-peer donations.

Case Study 3: GiveIndia / Ketto (Fundraising Platforms)

- **Overview:** GiveIndia and Ketto are among India's largest donation and crowdfunding platforms. They help NGOs and individuals raise funds for social causes, medical emergencies, and education.
- **Key Features:**
 - **Verified NGOs and campaigns** for donor trust.
 - **Transparency reports** on fund usage.
 - Easy online payment and recurring donation options.
- **Impact:**
 - GiveIndia has raised over **₹1,200+ crores** for NGOs.
 - Ketto has helped **thousands of individuals** raise funds for medical treatment.
- **Limitations:**
 - Focus mainly on **financial aid**; no system for goods or service donations.
 - No peer-to-peer community forum for users.
 - No geo-based visibility or direct donor-volunteer interaction.

Case Study 4: ZeroBuy (Community Sharing Platform)

- **Overview:**

ZeroBuy is a community-driven initiative that encourages people to stop unnecessary purchases by sharing, donating, or exchanging items and services for free. It promotes sustainability, reduces waste, and strengthens local communities.

- **Key Features:**

- **Peer-to-peer sharing** of goods and services at no cost.
- **Community-driven platform** connecting local people to help each other.

- **Impact:**

- Reduced landfill waste and promoted a **circular economy**.
- Helped communities save money and support underprivileged members.
- Fostered stronger **social bonds** through sharing and collaboration.

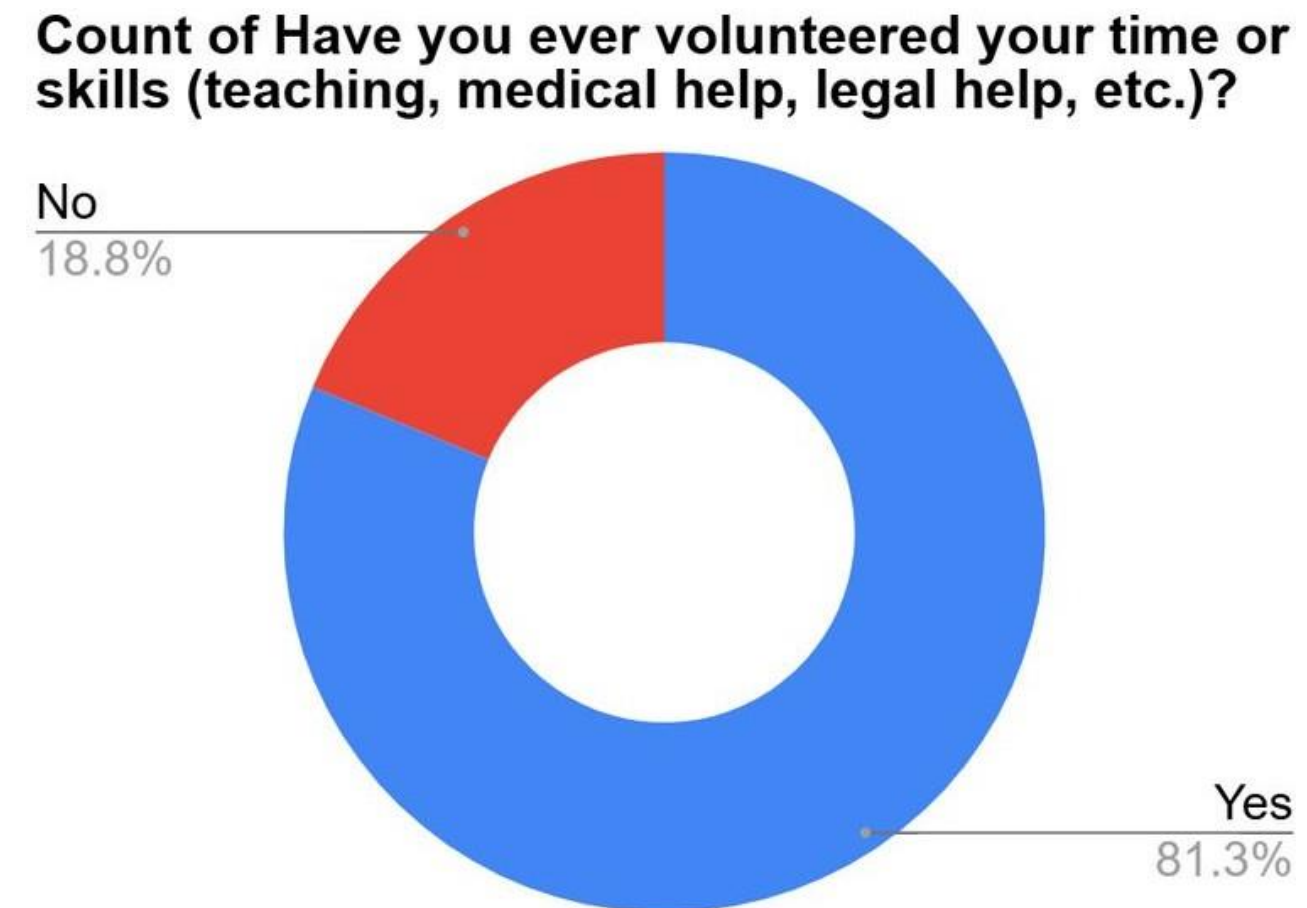

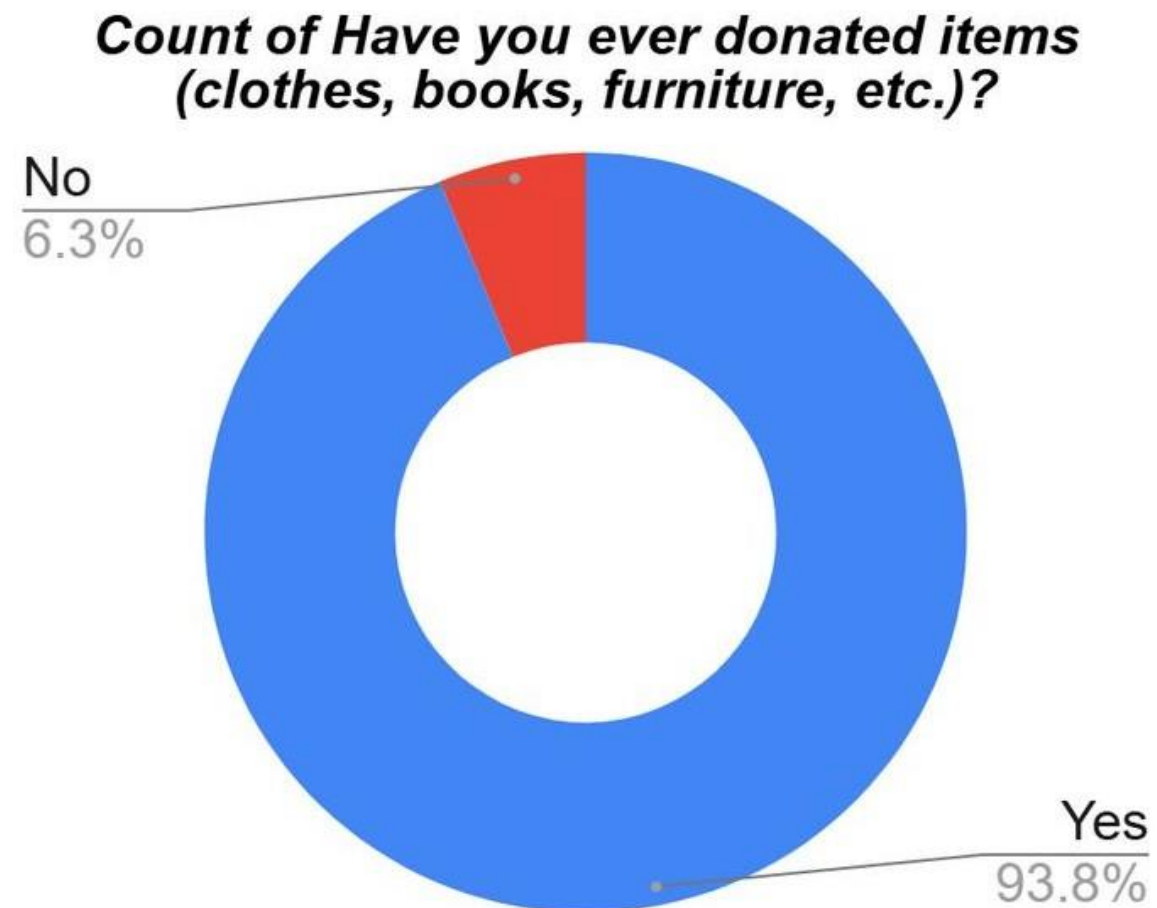

- **Limitations:**

- **Trust and verification** concerns for items and services.
- Engagement works best in **small/local communities**, harder to scale globally.
- Requires continuous motivation to keep users active

Comparison table

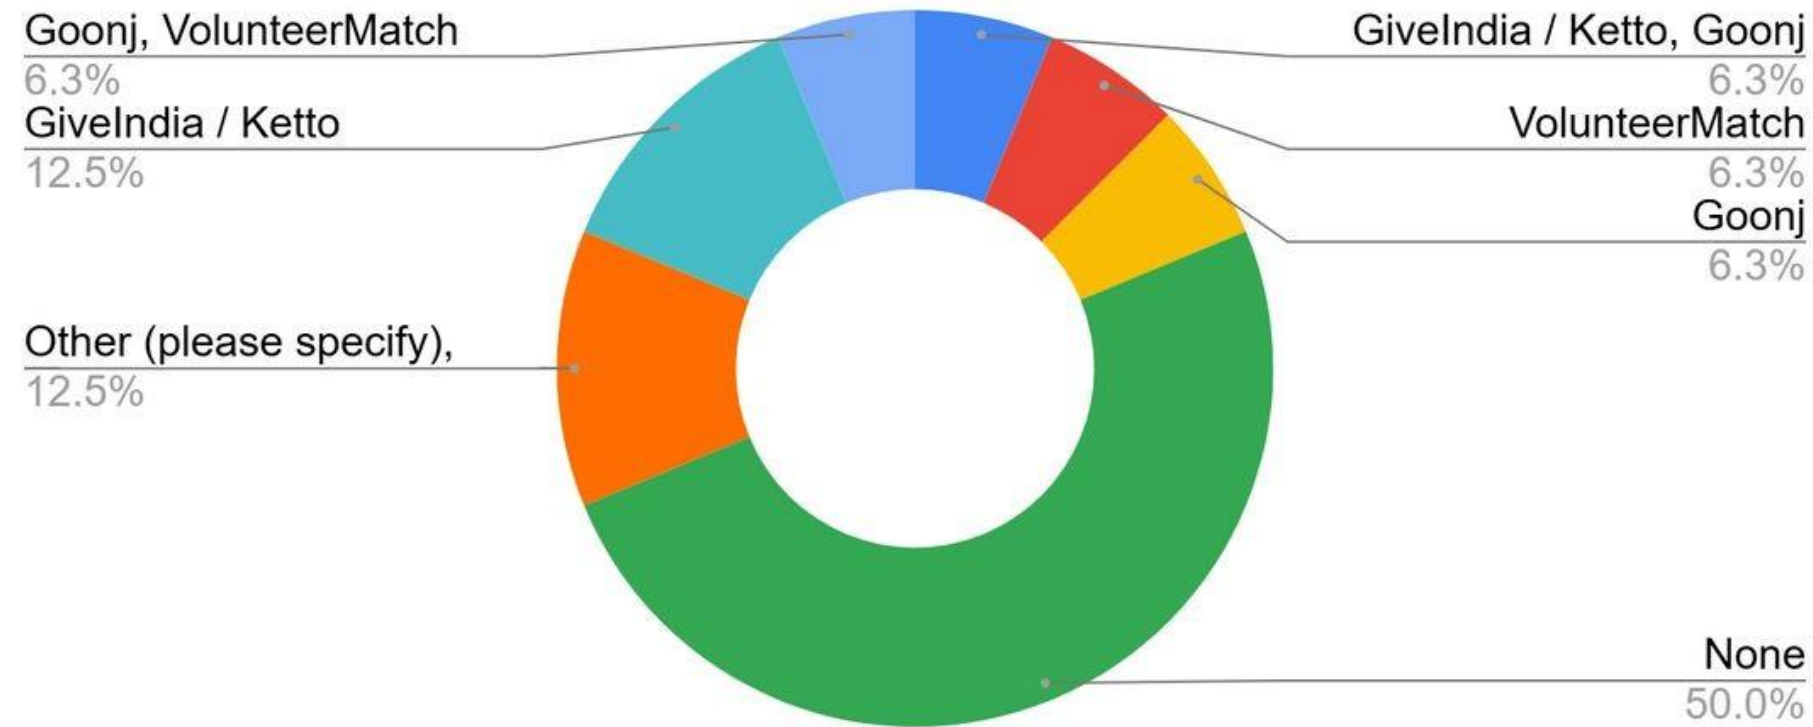

Features	KindAid (Our Project)	Goonj	GiveIndia / Ketto	VolunteerMatch	ZeroBuy
Goods / Item Donation	✓	✓	✗	✗	✓
Service / Skill Volunteering	✓	✗	✗	✓	✓
Fundraising / Monetary Help	✓	✗	✓	✗	✗
Community Forum (Q&A)	✓	✗	✗	✗	✗
Peer-to-Peer Help (User ↔ User)	✓	✗	✗	✗	✓
NGO Needs Posting	✓	✓	✓	✓	✗
Geo-based Visibility	✓	✗	✗	✗	✓

Market Research and Survey

- Measures past donation behavior to understand willingness to use KindAid for item donations.
- Checks if people are open to service-based contributions, not just material goods.

Count of Which platforms have you used before for donation/volunteering?

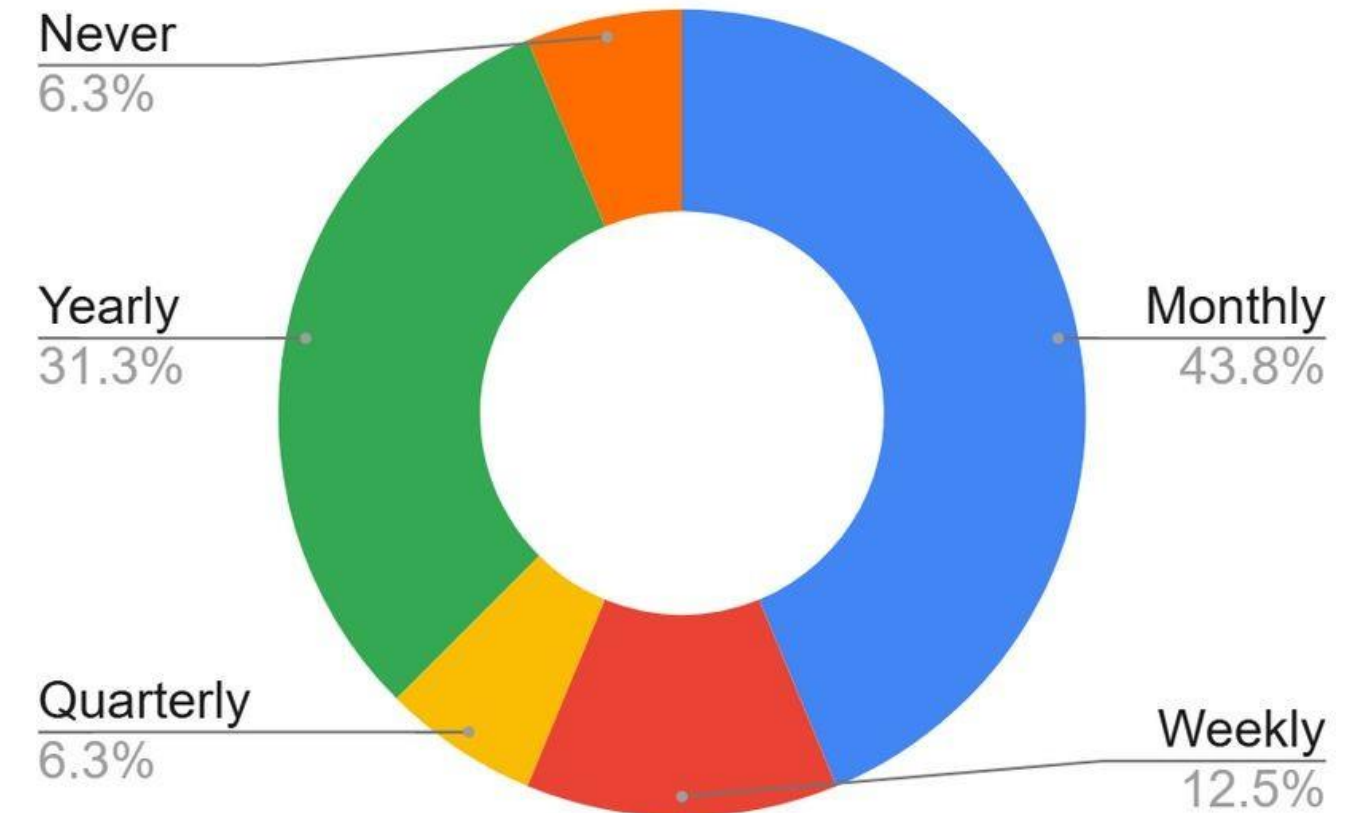

Purpose: Identifies competitor usage.

- If many users have tried **GiveIndia/Ketto/Goonj**, it shows a market exists but also highlights gaps.
- If very few have used platforms, there's a chance to capture an untapped audience.

Use in project: Learn from competitor strengths and weaknesses to refine **KindAid's positioning**.

Count of How often do you usually contribute (donations or volunteering)?

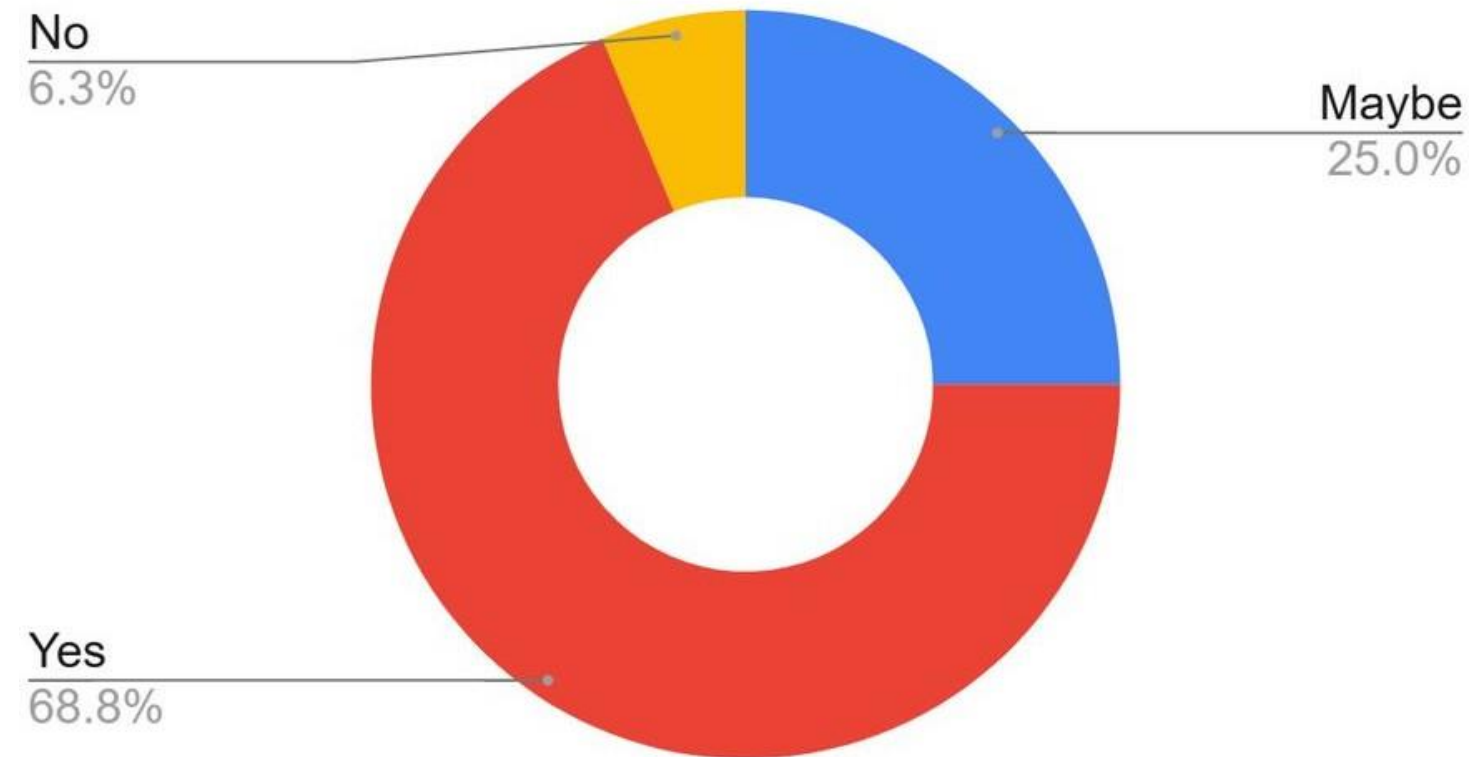

Purpose: Understands donation/volunteering frequency.

- Regular donors/volunteers = high engagement potential.
- One-time donors = need reminders, gamification, or impact stories.

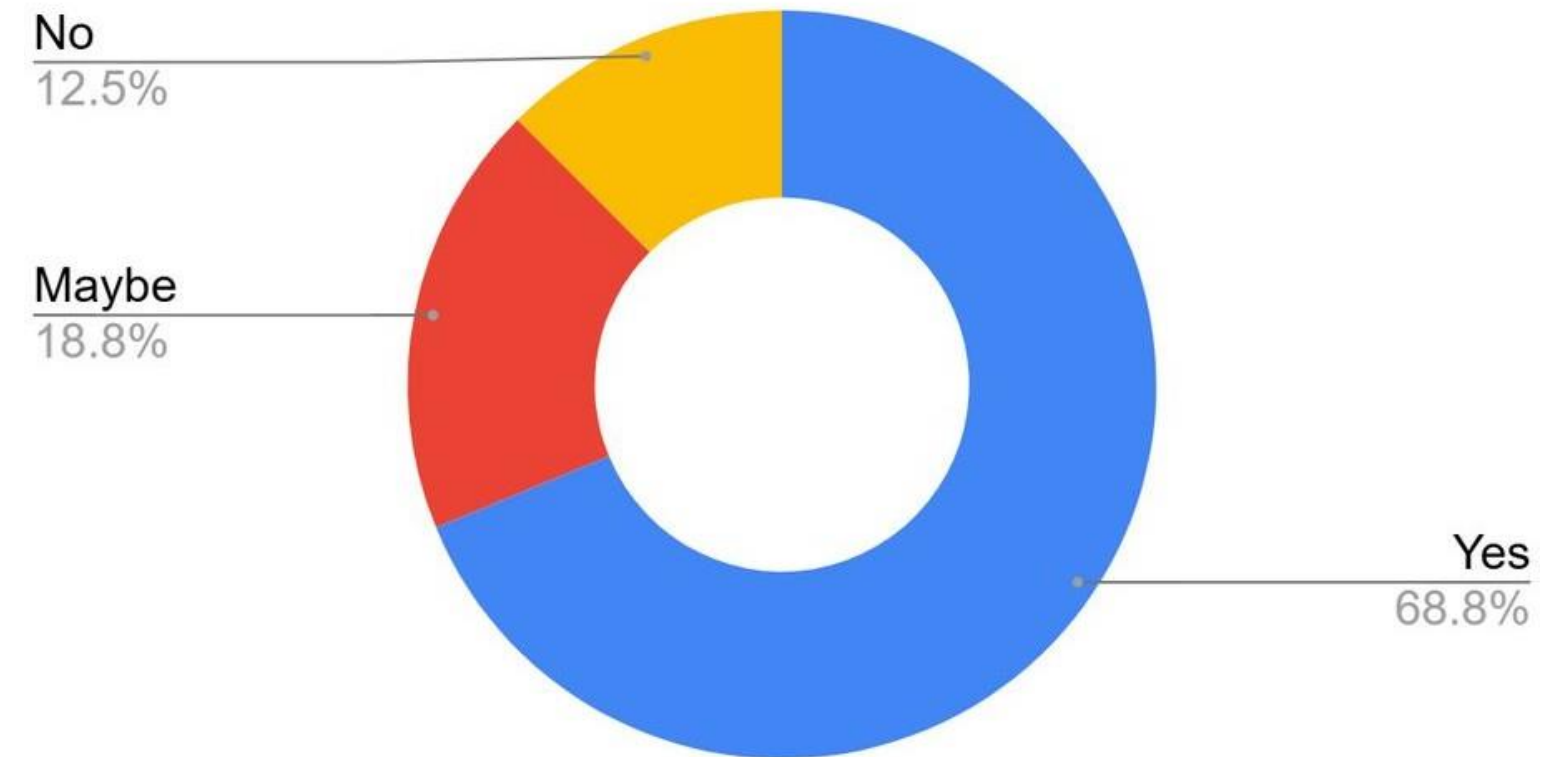

Use in project: Helps design **engagement features** (notifications, reports, impact tracking).

Count of Would you be interested in a community forum (like Quora) to ask/answer help-related questions?

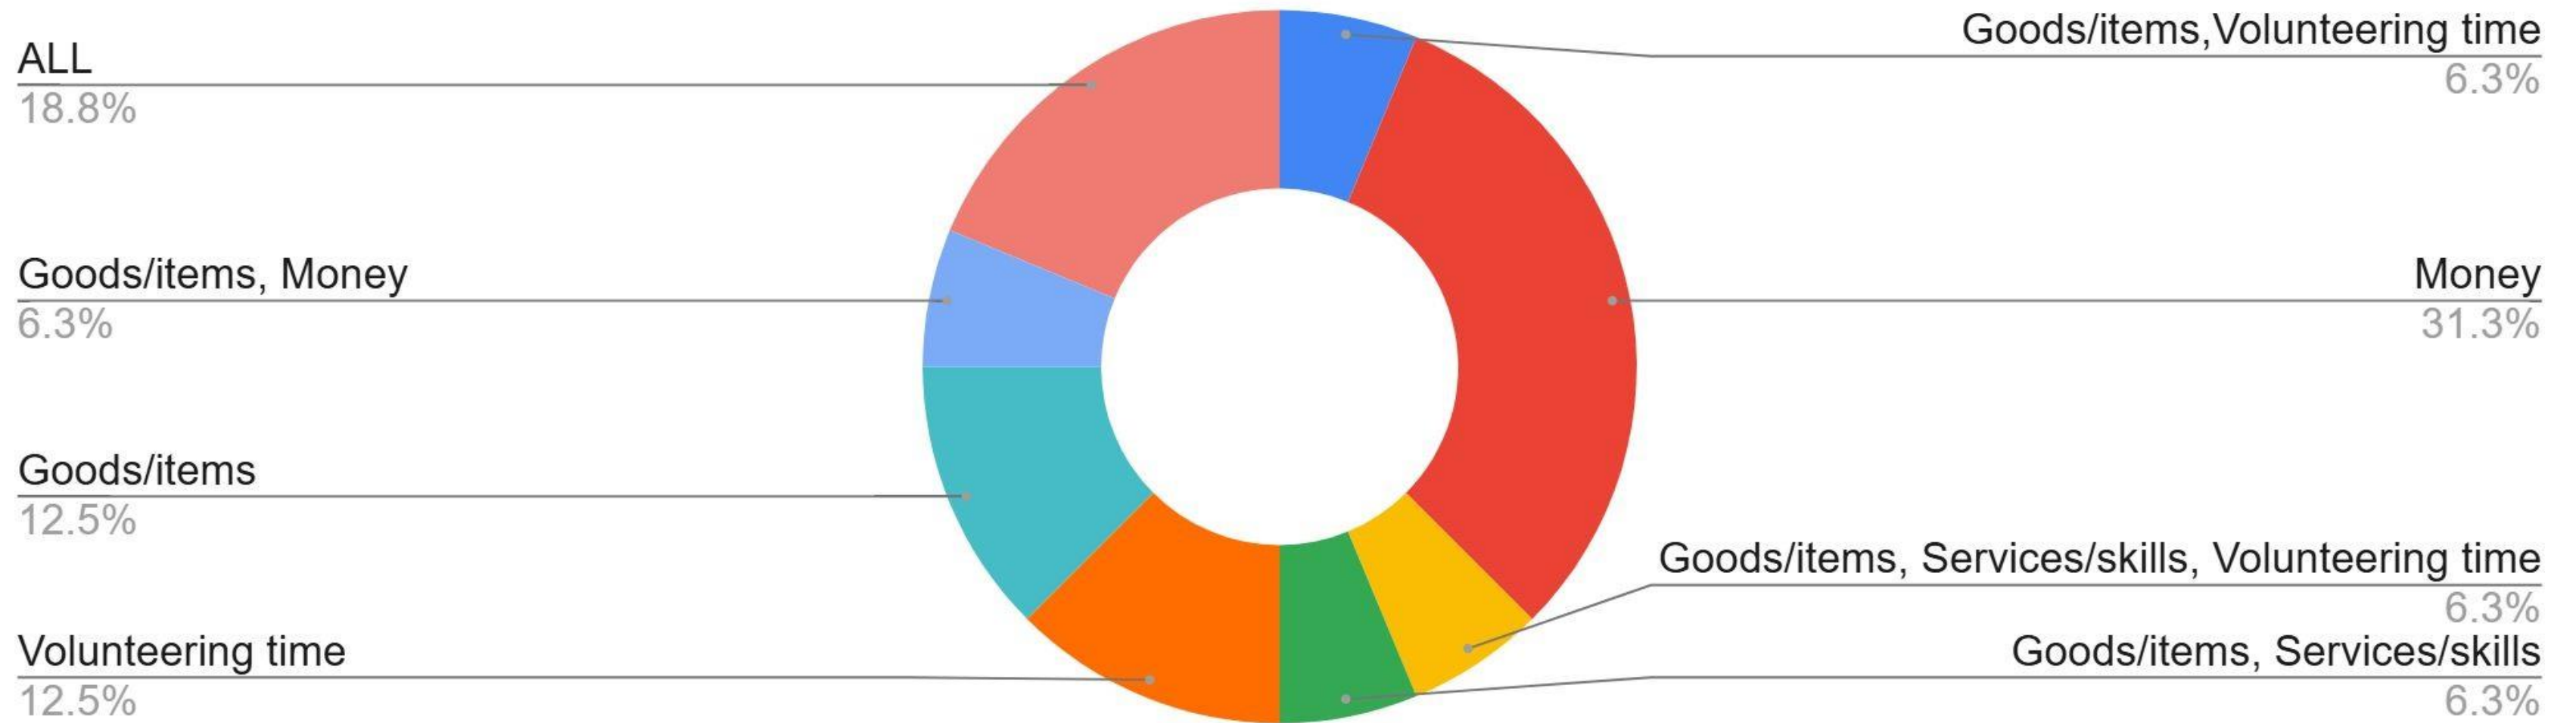

- **Purpose:** Check interest in peer-to-peer help community.
- **Why important:** Increases engagement & retention through discussion.
- **Use:** Justifies adding a community forum in MVP.

Count of Would you be interested in peer-to-peer help (donating directly to another user, not just NGOs)?

- **Purpose:** Validate interest in direct user-to-user donations.
- **Why important:** Builds trust & emotional connection beyond NGOs.
- **Use:** Guides decision to add P2P donations with NGO support.

Count of What type of contribution would you prefer on a platform like KindAid? (choose all that apply)

Purpose: Finds out the **preferred mode of contribution**.

Why important:

- If most choose money → prioritize secure payment gateway.
- If most choose items/services → focus on logistics and service-matching.

Use in project: Prioritizes development effort on the **most demanded feature**.

Count of What are your main concerns about using such platforms?

Trust / Verification, Privacy & Data Security

6.3%

Trust / Verification

12.5%

Trust / Verification, Hidden Fees, Time Commitment

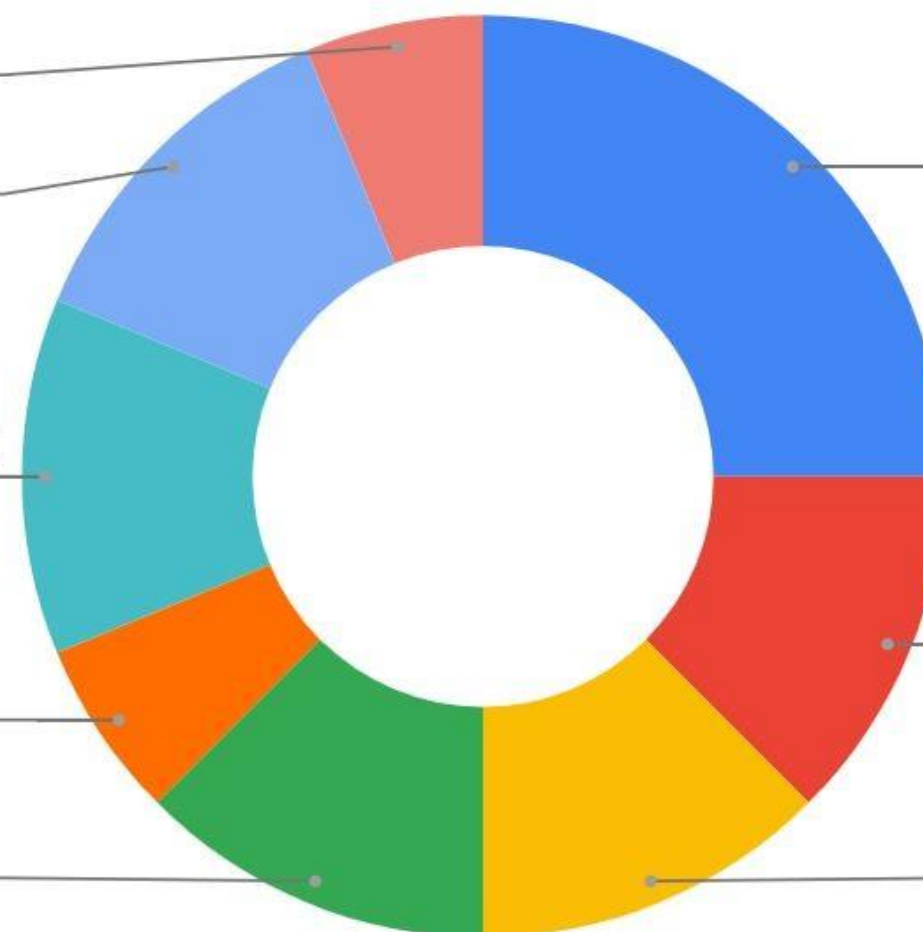

12.5%

Trust / Verification, Hidden Fees

6.3%

Trust / Verification, Logistics & Pickup

12.5%

ALL

25.0%

Logistics & Pickup, Privacy & Data Security

12.5%

Privacy & Data Security

12.5%

Purpose: Identifies barriers stopping people from donating/volunteering online.

Common concerns:

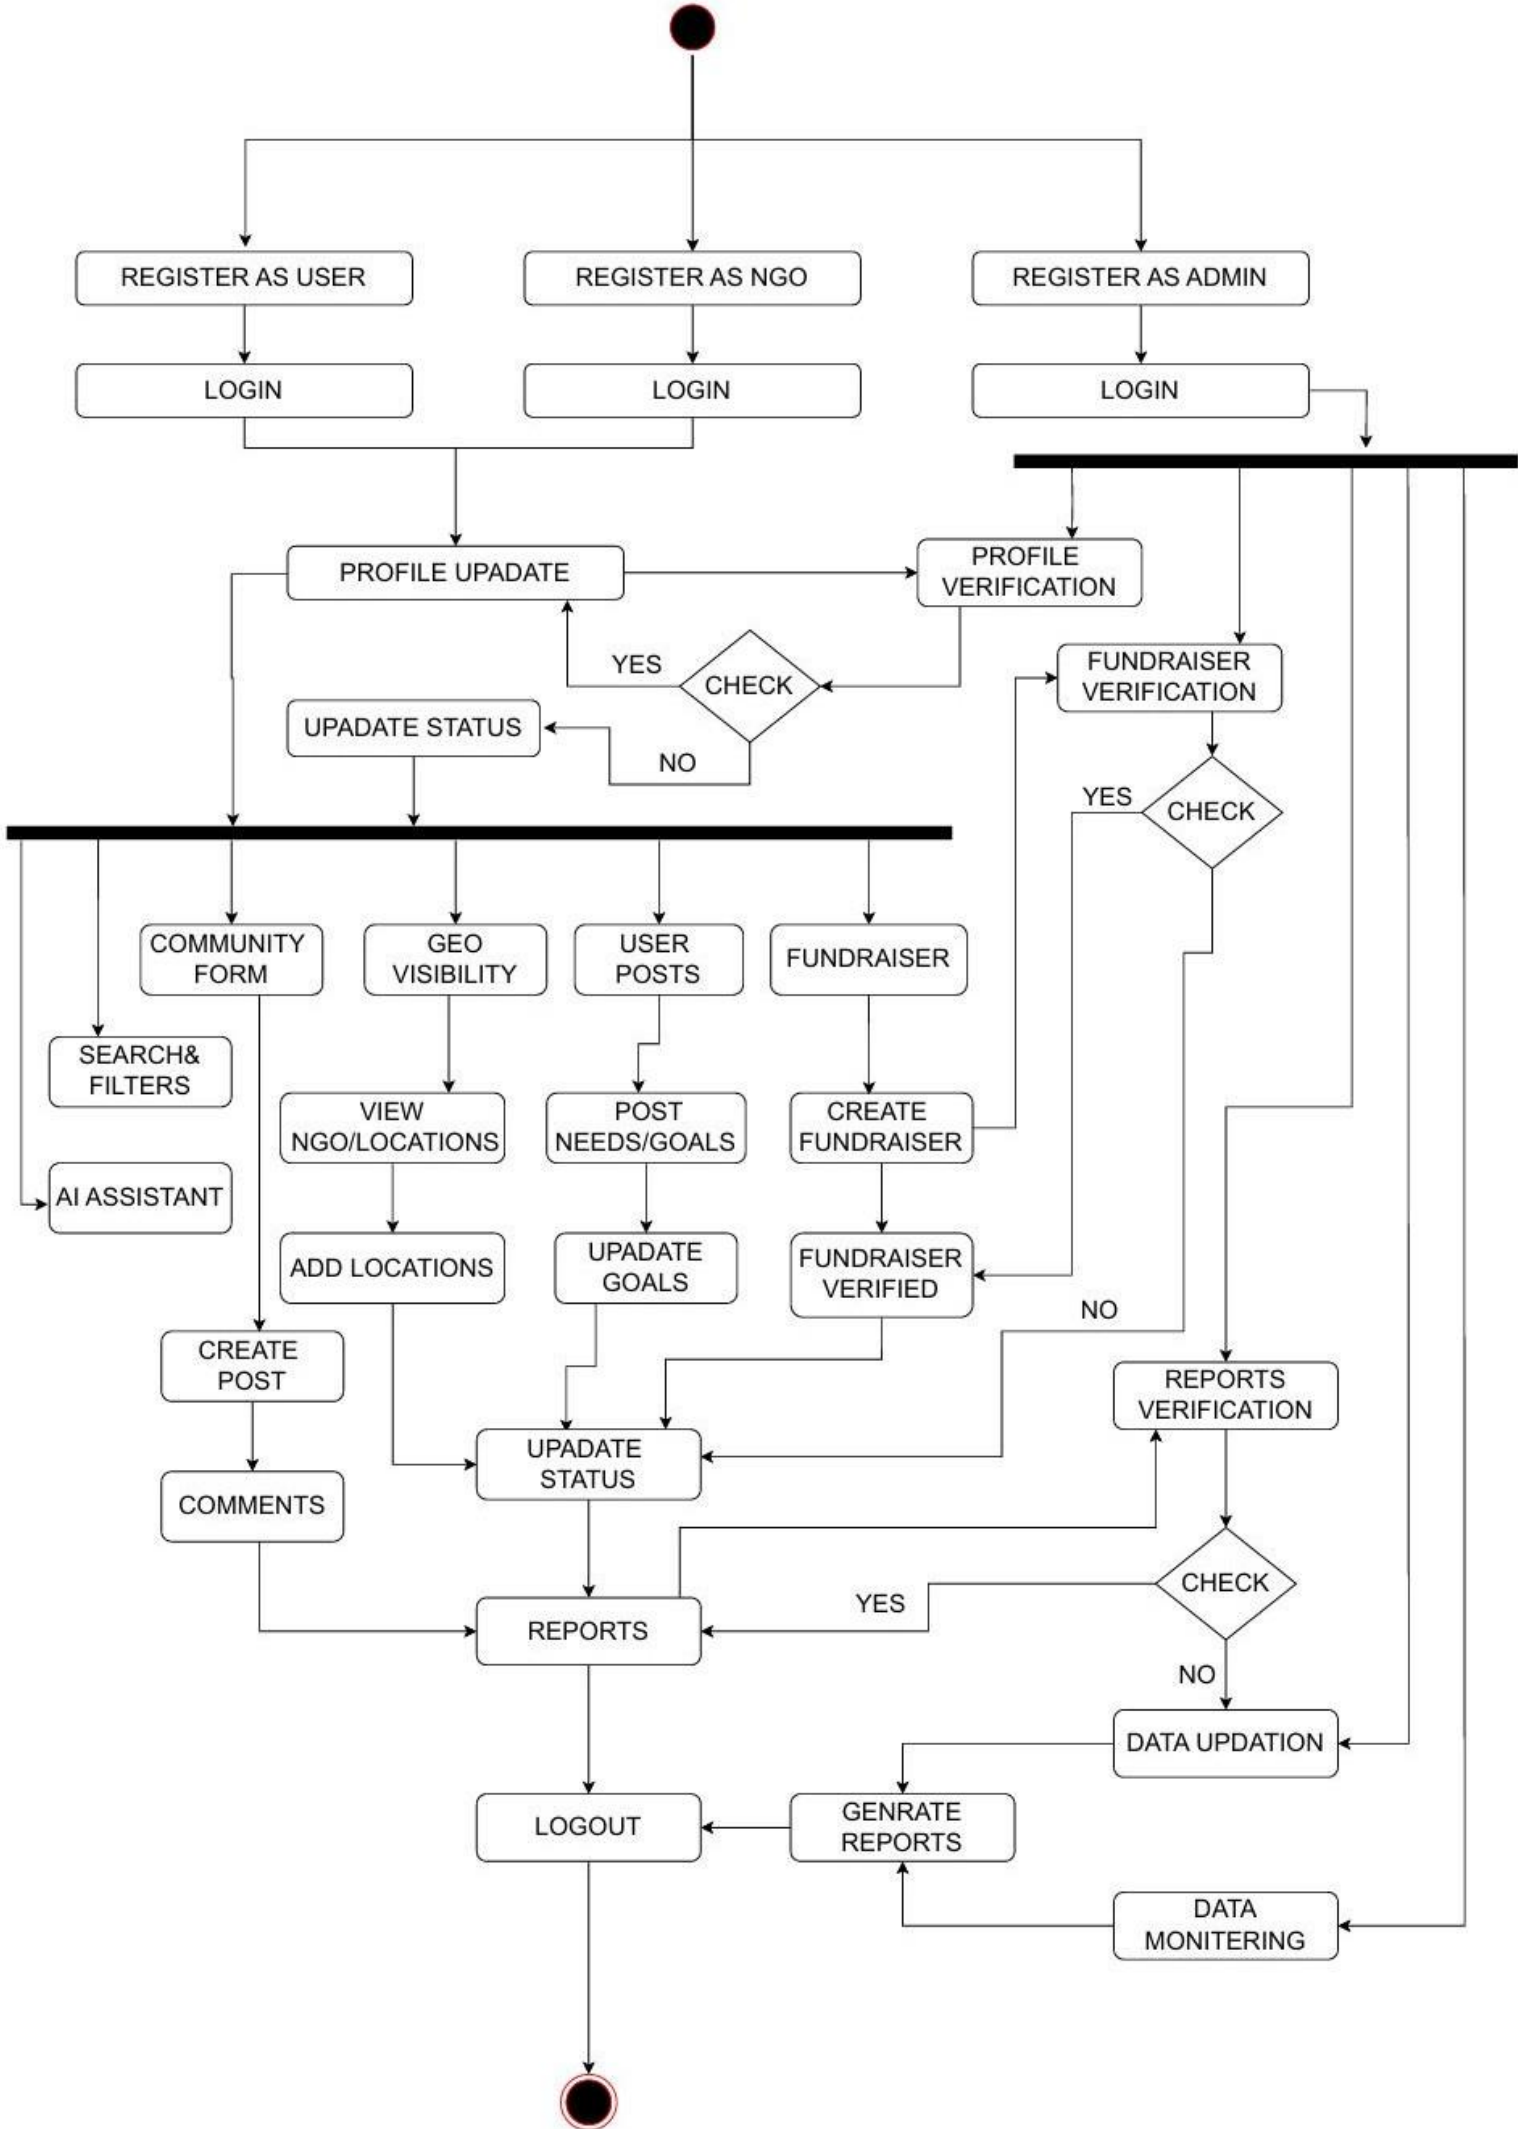

- Transparency (Will my donation be used properly?).
- Trust (Is the platform or NGO genuine?).
- Security (Is my personal/financial data safe?).

Use in project: Directly informs solutions → **transparency reports, verified NGOs, secure payments.**

Account TABLE

Column Name	Data Type	Key	Default	Description
account_id	INT	PK	Auto Increment	Unique ID for each account
account_type	ENUM('User','NGO')	—	—	Defines account type
name	VARCHAR(150)	—	—	Full name of user/NGO
email	VARCHAR(100)	UNIQUE	—	Email address (login credential)
contact_no	VARCHAR(15)	—	NULL	Contact number
password	VARCHAR(255)	—	—	Encrypted password
address	VARCHAR(255)	—	NULL	User/NGO address
profile_photo	VARCHAR(255)	—	NULL	Path to profile image
bio	TEXT	—	NULL	Description/About
verified_status	ENUM('Pending','Verified','Rejected')	—	'Pending'	Admin verification status
document_1	VARCHAR(255)	—	NULL	Uploaded ID/NGO document
document_2	VARCHAR(255)	—	NULL	Additional document
created_at	DATETIME	—	CURRENT_TIMESTAMP	Account creation date
reset_otp	varchar(10)	—	NULL	OTP
otp_expires_at	DATETIME	—	NULL	OTP expiry

COMMUNITY_FORUM TABLE

Field Name	Data Type	Size	Description
post_id	INT	10	Unique identifier for each forum post.
account_id	INT	10	ID of the account who created the post (FK).
description	TEXT	—	Content or message of the post.
image_1	VARCHAR	20	Path/URL of the first image.
image_2	VARCHAR	20	Path/URL of the second image.
likes_count	INT	10	Total number of likes on the post.
created_at	DATETIME	—	Post creation date.
status	ENUM('Active','Reported','Removed')	—	Status of the post.

COMMUNITY_COMMENTS TABLE

Field Name	Data Type	Size	Description
comment_id	INT	10	Unique identifier for each comment.
post_id	INT	10	ID of the post being commented on (FK).
account_id	INT	10	ID of the user or ngo making the comment (FK).
comment_text	TEXT	—	The comment content.
created_at	DATETIME	—	Comment date and time.

FUNDRAISER TABLE

Field Name	Data Type	Size	Description
<code>fundraiser_id</code>	INT	10	Unique identifier for each fundraiser (PK).
<code>account_id</code>	INT	10	ID of the Account who started the fundraiser (FK).
<code>title</code>	VARCHAR	20	Fundraiser title or campaign name.
<code>description</code>	TEXT	—	Explanation of the cause.
<code>goal_amount</code>	DECIMAL(10,2)	—	Target donation goal.
<code>collected_amount</code>	DECIMAL(10,2)	—	Amount collected so far.
<code>image_1,image_2</code>	VARCHAR	20	2 Image related to fundraiser.
<code>document_1,document_2</code>	VARCHAR	20	2 Verification documents.
<code>verified_status</code>	ENUM('Pending','Verified','Rejected')	—	Admin verification status.
<code>created_at</code>	DATETIME	—	Fundraiser creation timestamp.

GEO_VISIBILITY TABLE

Field Name	Data Type	Size	Description
geo_id	INT	10	Unique identifier for map entry.
account_id	INT	10	ID of the user/NGO who marked the location (FK).
latitude	DECIMAL(10,7)	—	Latitude coordinate.
longitude	DECIMAL(10,7)	—	Longitude coordinate.
description	TEXT	—	Details about the help request or NGO location.
goal_status	ENUM('Pending','Ongoing','Completed')	—	Help progress status.
created_at	DATETIME	—	When the marker was created.

NEEDSTABLE (NeedPage)

Field Name	Data Type	Key	Size	Description
need_id	INT	PK	10	Unique identifier for post.
account_id	INT	FK	10	ID of the user/NGO (FK).
description	TEXT		—	Description of the post or need.
progress_percent	INT		0	Completion percentage
image_1	VARCHAR		25	First image.
image_2	VARCHAR		25	Second image.
goal_title	VARCHAR		20	Goal name (e.g., "Book Donation").
goal_status	ENUM('Pending','Ongoing','Fulfilled')		—	Indicates progress.
created_at	DATETIME		—	Date of posting.

REPORTS TABLE

Field Name	Data Type	Size	Description
report_id	INT	10	Unique report ID.
reported_by	INT	10	User or ngo who submitted report (FK).
target_type	ENUM('User','NGO','Post','Fundraiser','Comment')	—	Type of entity being reported.
target_id	INT	10	ID of the reported entity.
reason	TEXT	—	Reason for reporting.
created_at	DATETIME	—	Report submission time.
status	ENUM('Pending','Reviewed','Action_Taken')	—	Admin action status.

DONATION TRANSACTION TABLE

Field Name	Data Type	Size	Description
transaction_id	INT	10	Unique ID for transaction.
fundraiser_id	INT	10	Linked fundraiser (FK).
donor_id	INT	10	ID of the donating user (FK).
amount	DECIMAL(10,2)	—	Donation amount.
payment_method	ENUM('COD','Online'))	—	Payment type.
transaction_date	DATETIME	—	Date and time of donation.

ADMIN TABLE

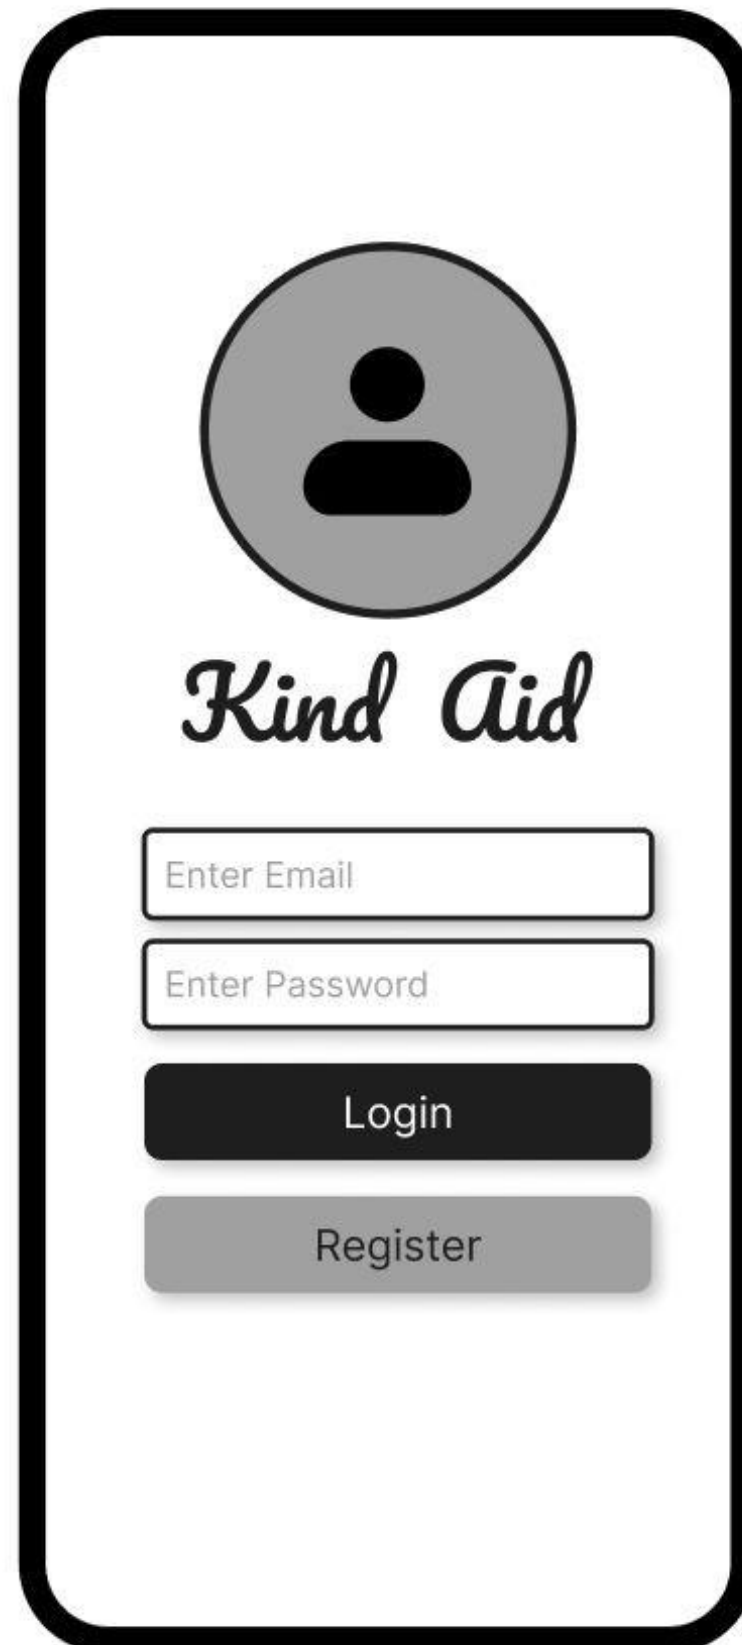

Field Name	Data Type	Size	Description
<code>admin_id</code>	INT	10	Unique identifier for admin.
<code>name</code>	VARCHAR	20	Admin name.
<code>email</code>	VARCHAR	20	Admin email.
<code>password</code>	VARCHAR	20	Encrypted password.
<code>role</code>	ENUM('Super Admin','Moderator')	—	Defines admin access level.
<code>created_at</code>	DATETIME	—	Creation date

11. DATA RELATIONSHIP SUMMARY

Relationship	Description
Accounts ↔ Community Forum	One-to-Many (A user or an NGO can create many posts)
Accounts ↔ Comments	One-to-Many
Accounts ↔ Fundraiser	One-to-Many
Accounts ↔ Geo Visibility	One-to-Many
Accounts ↔ Posts	One-to-Many
Fundraiser ↔ Donations	One-to-Many
Admin ↔ Reports	One-to-Many

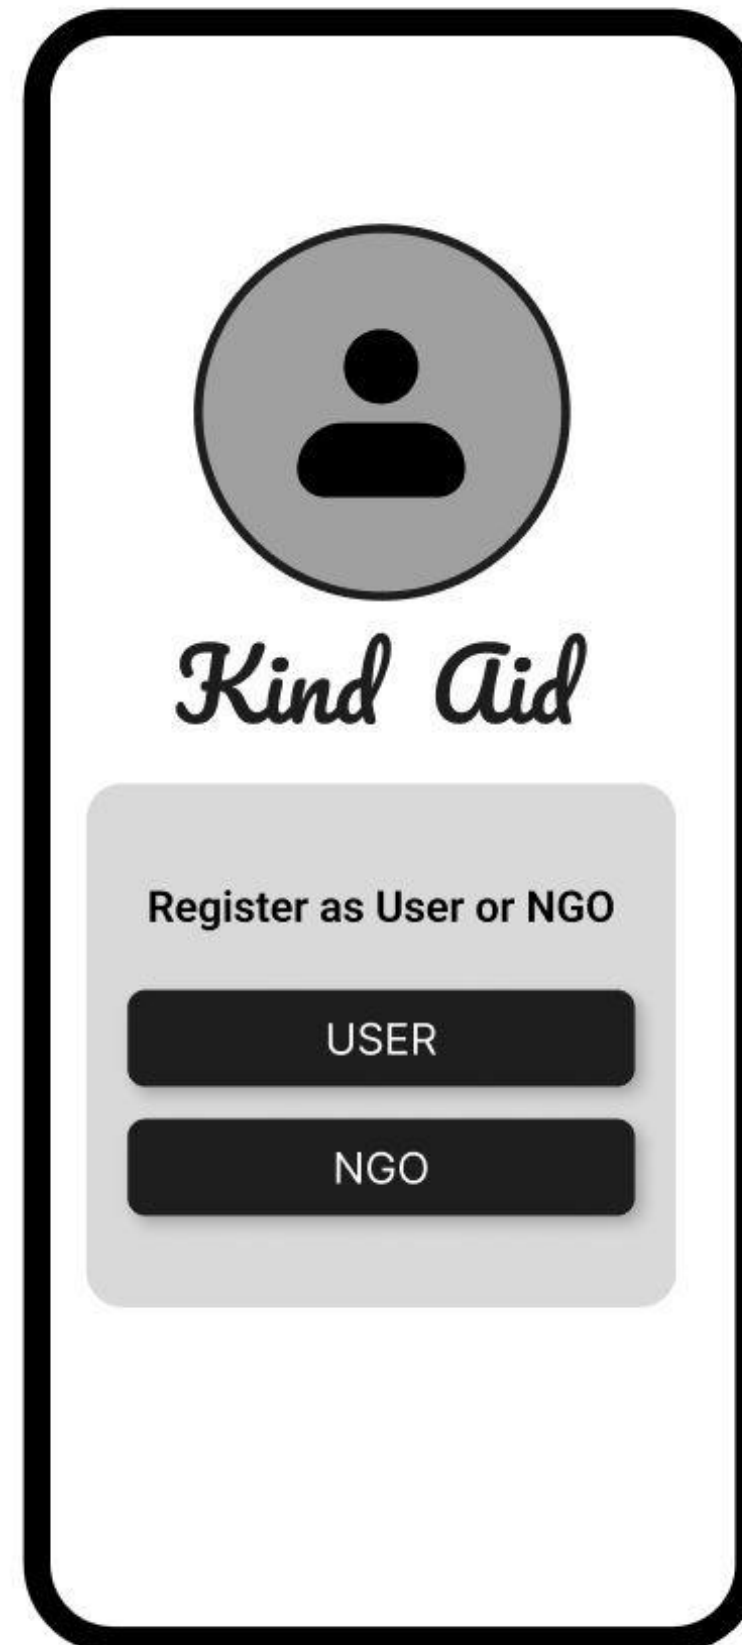

Wireframes (LOGIN/REGISTER)

Login

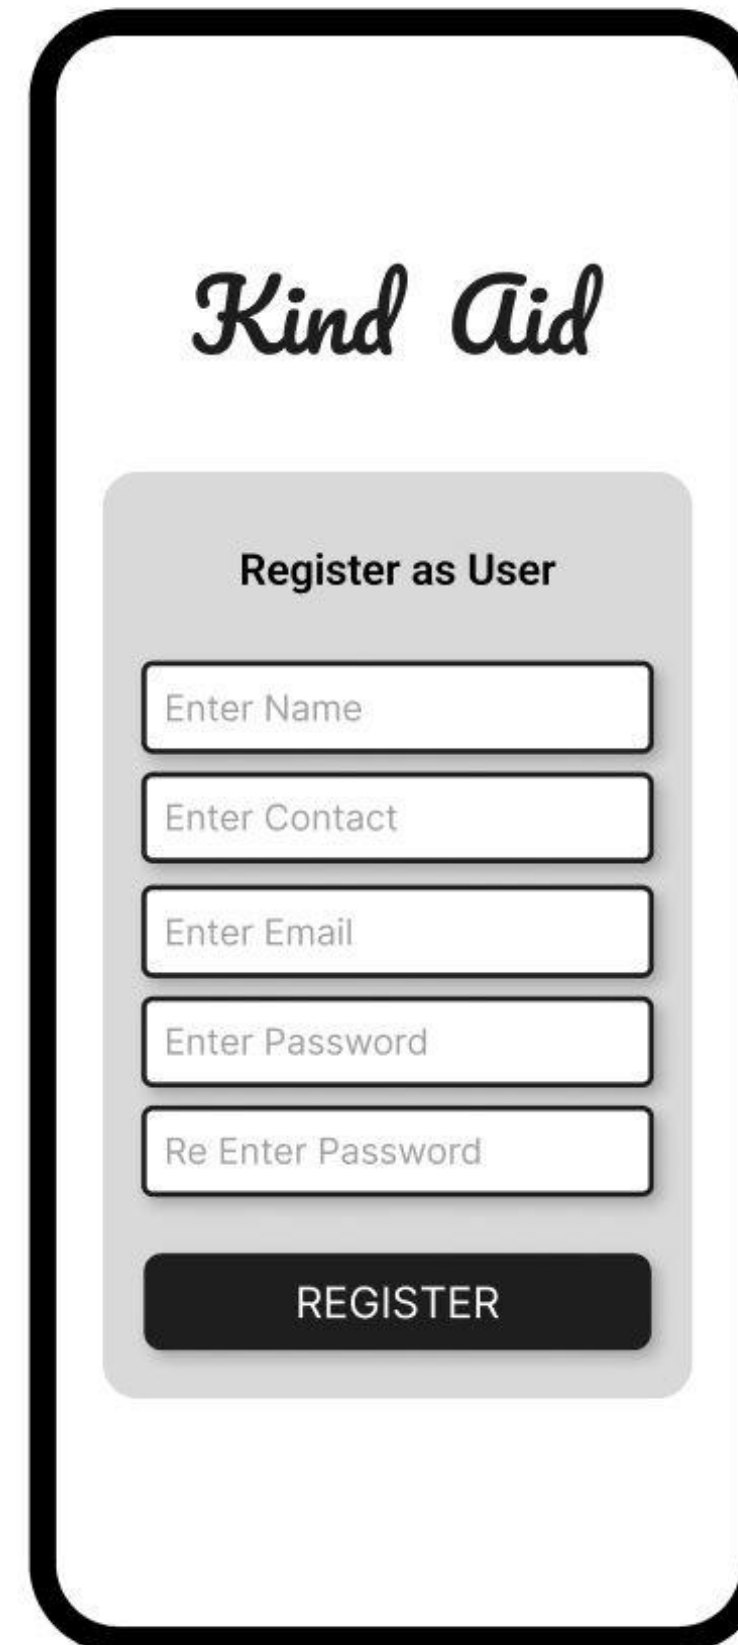

The login wireframe for 'Kind Aid' features a large circular icon with a person silhouette at the top. Below the icon is the brand name 'Kind Aid' in a script font. The form includes two input fields: 'Enter Email' and 'Enter Password'. Below these fields are two buttons: a dark 'Login' button and a light 'Register' button.

Register

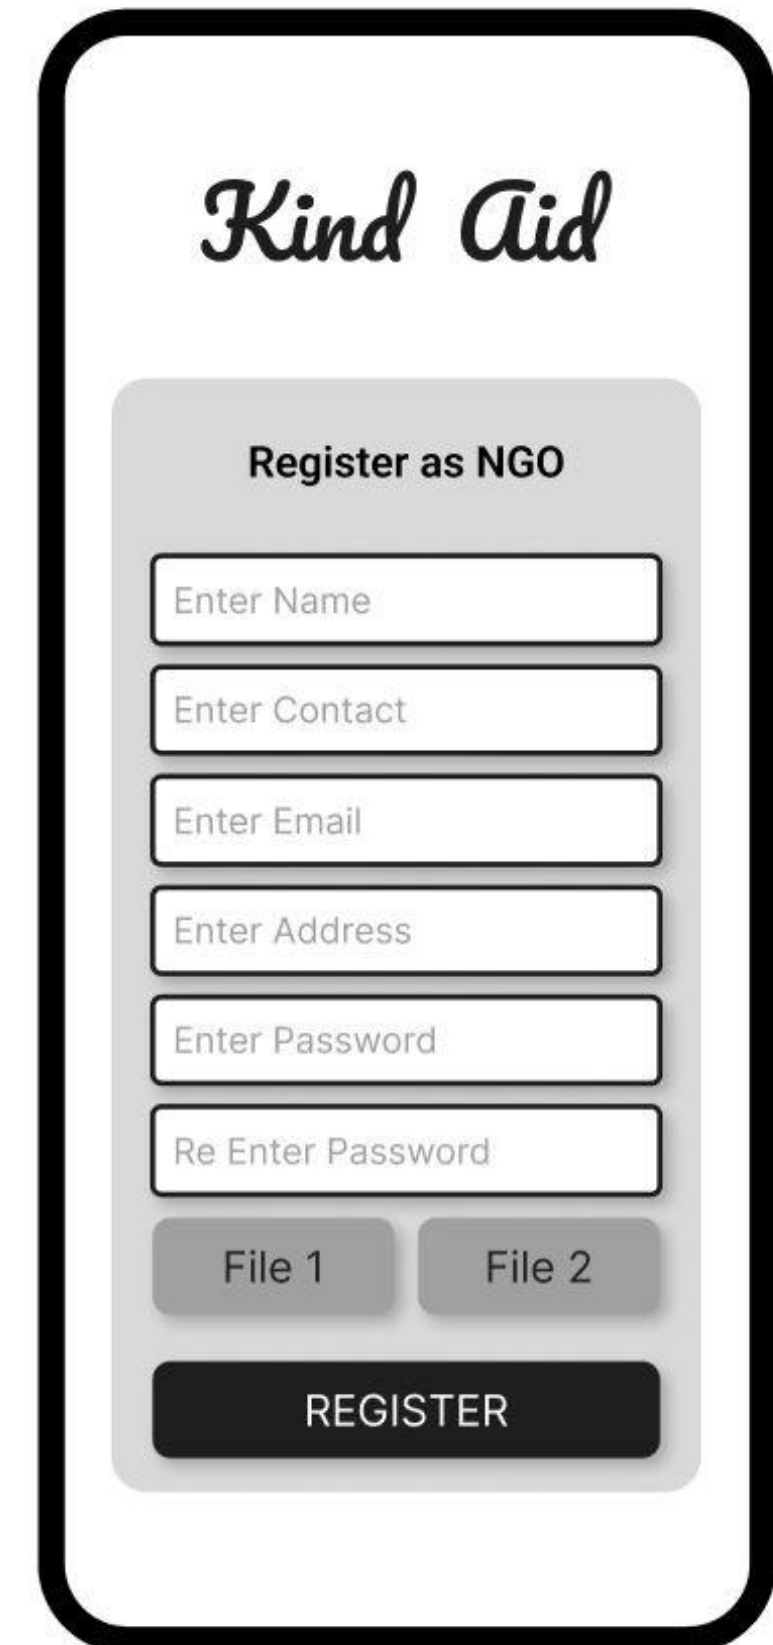

The register wireframe for 'Kind Aid' features a large circular icon with a person silhouette at the top. Below the icon is the brand name 'Kind Aid' in a script font. The form includes a section titled 'Register as User or NGO' with two buttons: 'USER' and 'NGO'.

Register 1

The 'Register 1' wireframe for 'Kind Aid' features the brand name 'Kind Aid' at the top. The form includes a section titled 'Register as User' with five input fields: 'Enter Name', 'Enter Contact', 'Enter Email', 'Enter Password', and 'Re Enter Password'. Below these fields is a dark 'REGISTER' button.

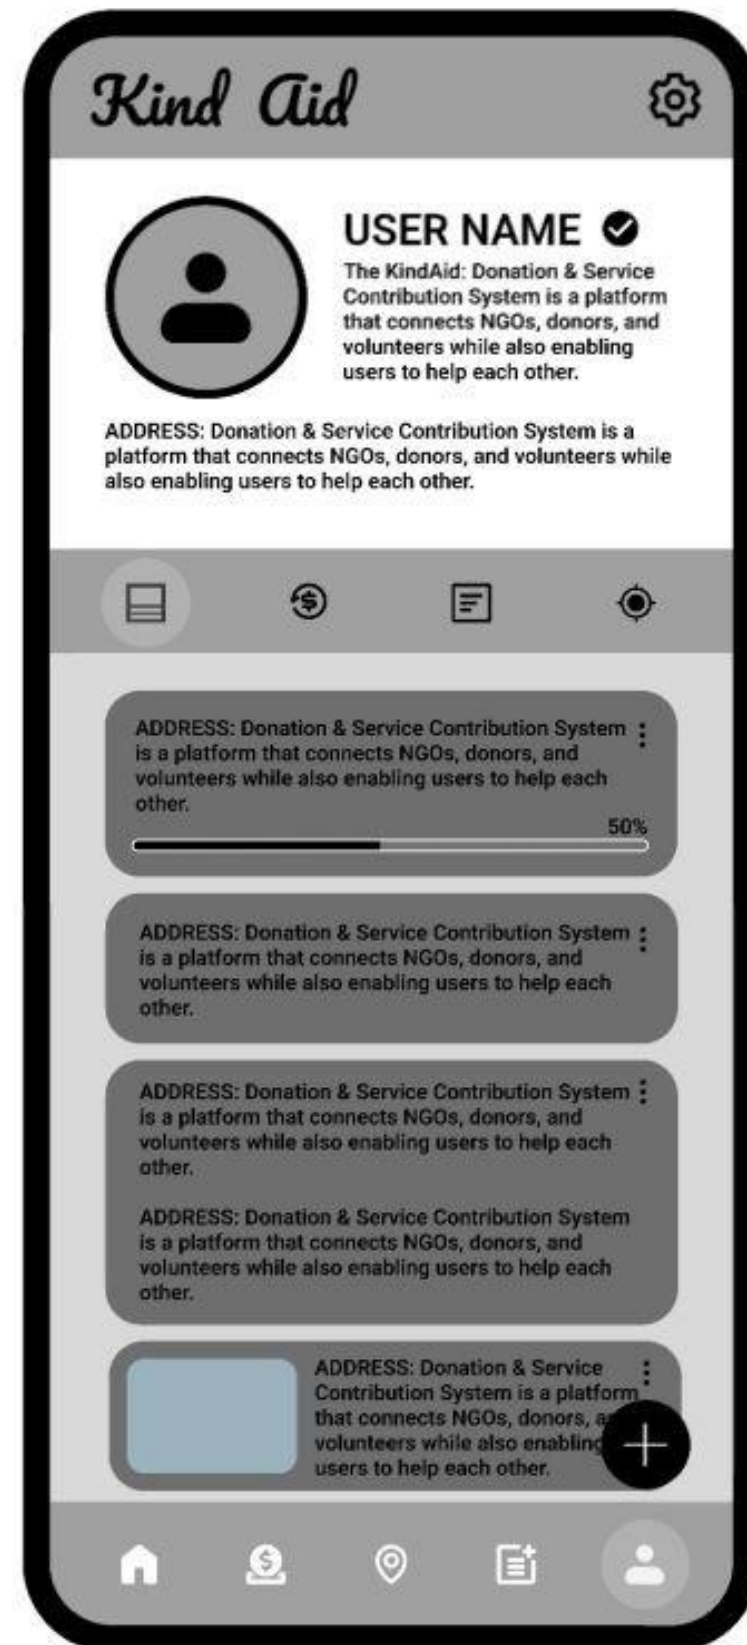

Register 2

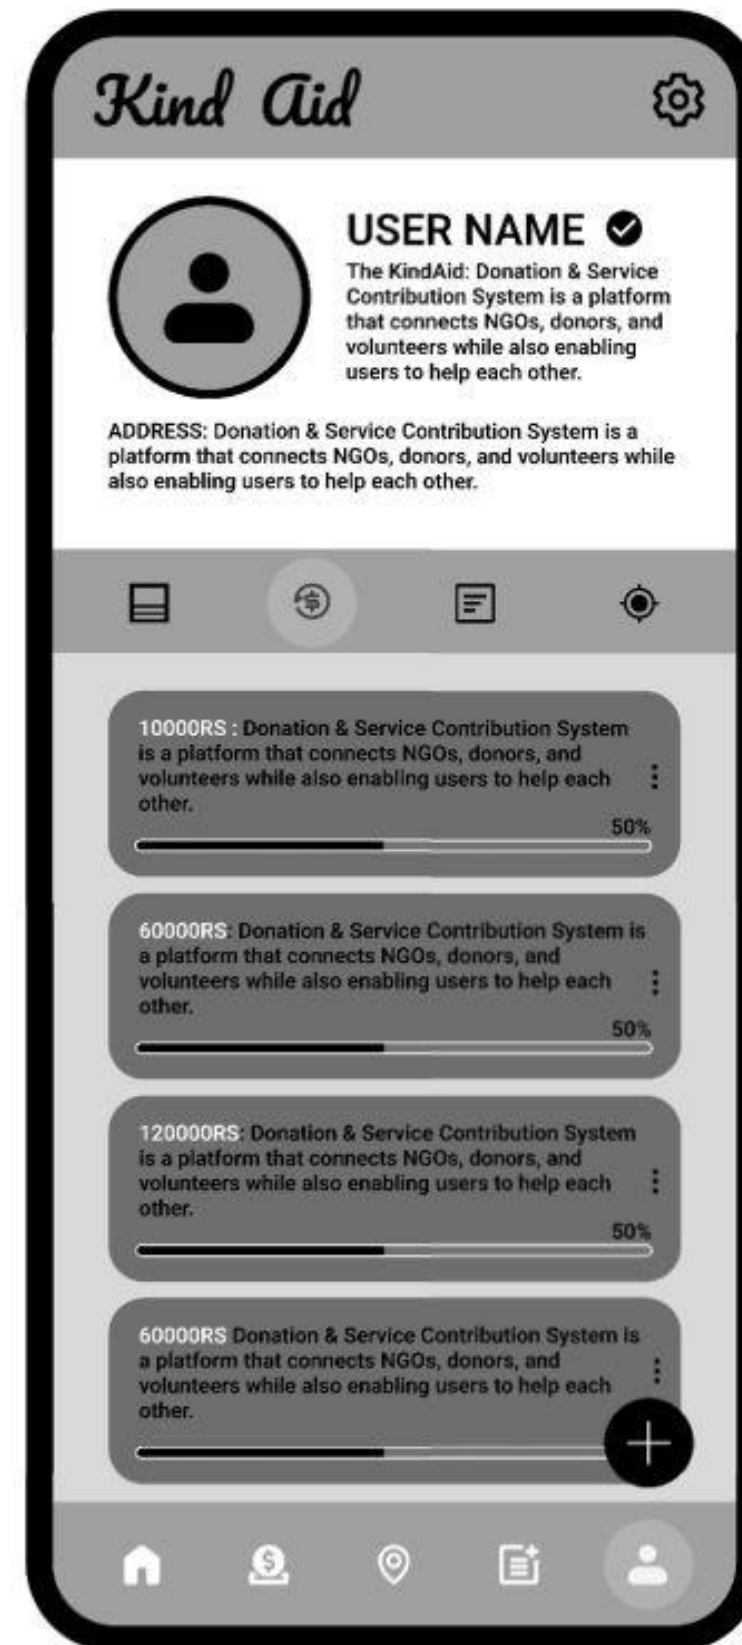

The 'Register 2' wireframe for 'Kind Aid' features the brand name 'Kind Aid' at the top. The form includes a section titled 'Register as NGO' with six input fields: 'Enter Name', 'Enter Contact', 'Enter Email', 'Enter Address', 'Enter Password', and 'Re Enter Password'. Below these fields are two buttons: 'File 1' and 'File 2', and a dark 'REGISTER' button.

🤖 Hi! I'm KindAid Assistant 🤖

I can help you:

- 🔍 Search fundraisers, needs, users & posts
- 📁 Browse by category (Medical, Food, Education...)
- 🤖 Chat with AI for guidance
- 📖 Learn how to use KindAid

Type naturally — just tell me what you're looking for!

🤖 KindAid is a warm community-impact and charity app designed for India! It connects people to make a difference by letting users post fundraisers, share community needs, update on local events, and mark help-point locations. You can easily donate to causes you care about or find support. We're here to help build a kinder community together!

🤖 KindAid is built on the spirit of support! You can find support by posting a fundraiser or a community need, allowing our kind community to assist. Conversely, you can offer support by donating to causes you care about or responding to requests. We're here to help you connect and make a difference together.

What is KindAid?

support

Expected Outcome of KindAid

- **Faster Access:** NGOs and individuals quickly get needed goods, funds, and services.
- **Efficient Use:** Reduces waste by reusing good-condition items.
- **Community Support:** Forums enable Q&A, guidance, and peer-to-peer help.
- **Volunteer Boost:** Encourages more people to contribute skills and time.
- **Trust & Transparency:** Donation tracking builds confidence.
- **Cost & Time Savings:** Geo-based matching cuts logistics costs.
- **NGO Empowerment:** Easy need-posting, donor connections, and fundraising.
- **Bigger Impact:** More donations, volunteers, and support drive social change.

Future directions

- **Platform Expansion:** Add more aid categories and partner with NGOs.
- **Transparency:** Publish reports and consider blockchain for fund tracking.
- **AI Integration:** Match donors with causes and analyze trends.
- **Community Engagement:** Forums, volunteer services, and gamification.
- **Automation:** Recurring donations and fraud detection.
